

SLUDGE AND WASTEWATER PIPE
Ina Road Water Pollution Control Plant
Pima County (Tucson), Arizona

- **SERVICE:**
Carries primary, degrittied, digested, and activated sludge. Transport and re-circulate wastewater between various clarifying tanks and other treatment apparatus. Large portions of the lines were installed in underground tunnels.
- **PIPE SYSTEM:**
Over 16,000 ft. of GREEN THREAD®, POLY THREAD® and BIG THREAD® piping
- **FEATURES & BENEFITS:**
The corrosion resistance of fiberglass pipe offers lower maintenance and longer service life.

The lighter weight of fiberglass piping vs. steel and concrete piping made the installation quicker and easier.

The flow characteristics were similar to glass-lined steel pipe.

Could be periodically steam cleaned to prevent clogging.
