

Chief Seattle Fireboat

Application: Shipboard Piping

Product: Epoxy Pipe and Fittings

Features & Benefits: In 1984, the Seattle Chief fireboat was built by Nickle Brothers, located in Seattle. All internal piping was A. O. Smith Silver Thread®. This piping system has provided 24 years of reliable service in a demanding marine environment.

The Silver Thread product line has been superseded by Red Thread® and Green Thread® epoxy piping systems, which incorporate the same premium, aromatic amine epoxy system with other improved features and benefits. NOV Fiber Glass Systems offers marine offshore type approvals from eight different national agencies, as well as a wide variety of other approvals, certifications and quality assurance regulations.
